### Introduction

This is a guide to the Edward P. Taylor Research Library's resources related to the Thomson Collection of European art objects. As the collection contains a wide variety of objects from various periods, not all resources related to a particular type of object can be listed here. Many additional resources can be found by searching the library's online catalogue, using 'Appendix A – Subject Headings' as your guide.

N.B. Separate resource guides are available for ivories and wood sculpture in the Thomson Collection; you may request these from the information desk.

### Periodicals

The library has holdings of a number of periodicals related to decorative arts. The best way to search for information is to use the *Bibliography of the History of Art* to search for a specific term. On any of the public-access computers, open 'Internet Explorer' and click on the 'Favourites' button in the toolbar. From the list at the far left, select 'Bibliography of the History of Art', and begin your search.

Check the results of your search against the online catalogue to see if the library has holdings of a particular periodical. You can search for the periodical title using the 'Title Alphabetical' feature in the online catalogue.

Sotheby's and Christies also hold regular decorative art auctions. Their websites (<http://www.sothebys.com> and <http://www.christies.com> respectively) allow users to search recent auction results. The library has extensive holdings of auction catalogues, however currently does not have access to a database which can search these catalogues for decorative art objects.
